

GLOBAL WIND DAY EVENT

*Gneeves Windfarm, Millstreet, Co Cork,
Sunday 14th June 12 to 6pm*

Type of event:

- Bouncy Castle
- Face Painting
- Entertainment
- Information on Wind Energy and the Gneeves Windfarm

Description: Gneeves is a 9.35MW Windfarm which has 11 V52 850kw turbines. The wind farm is located on the northeastern edge of the Derrynasaggart Mountain. The average hub height is 55mtrs. The site has a long term average windspeed of 8m/s. The grid connection for the site is 38kv from Rathmore. The site has its own independent lattice weather tower. The windfarm should displace 25,000 tonnes of CO2 every year and will produce enough green energy to meet the electricity needs of more than 8,500 homes

Location: Meeting at Millstreet GAA Community Centre from 12midday, here there will be Bouncy Castle, Face Painting, Entertainment, Information on Wind Energy, Information on the Building of Gneeves Windfarm and refreshments. From here we will be running buses to the windfarm to allow people view the turbines up close, see the inside of the turbines and substation control room.

Date and time: Sunday 14th June 12 to 6pm
